

Stroke: 11/17mm
 Max flow rate: 400 L/h
 Motors: 0,18 - 0,37 - 0,75 kW

**Plunger
 Metering Pump
 Positive Return**

API 675

*Model LY is the smallest of the four sizes in the "L" range; LY-LK-LN-LP.
 The pump is very compact, but has all the technical features of the positive displacement.
 The stroke adjustment is based on OBL's unique design.*

CONSTRUCTION CHARACTERISTICS

- OBL's metering pumps are used in several industrial plants. The "L" series ranges from the smallest capacity, 400 cc/h, to the largest, 11.000 L/h.
- All models can be built as multiple units with different sized heads.
- Each pumphead can have a different stroke rate since each has its own reduction gear.
- Power transmission through multiple units is easily achieved by a common motor-speed shaft, so the torque is lower than after the reduction gears.
- Positive displacement mechanism with mechanical return of the plunger, based on OBL's unique design.
- Smooth flowrate adjustment by control knob, either with pump in motion or stationary.
- 1% repeatability of flowrate within 10% and 100% of maximum capacity.
- Low NPSH requirement: as low as 1,5m in recommended installation conditions.

PUMP HEADS

The standard construction, up to 130 L/h, has duplex ball valves; higher flowrates have single valves.

- Materials of construction for wetted parts are:

- **Construction A:** AISI 316L
- **Construction P:** PVC-Ceramic - PTFE

Pumps in other materials such as Hastelloy, other alloys, PVDF etc., can be supplied on demand.

- Plunger packing is of reinforced Teflon chevron rings.
- Suction and discharge connections can be threaded or flanged, up to 130 L/h. For higher flowrates, flanged only.

- **Max. temperature of handled liquid:**
 - with standard stainless steel heads: 90 °C
 - with special stainless steel heads: 160 °C
 - with stainless steel heads and ceramic plunger: 90 °C
 - with PVC head: 40 °C
 - with PVDF head: 70 °C

Inox steel head, "A" execution, with threaded connections.

PVC head, "P" execution, with threaded connections.
